VISION BASED SENSOR AND NAVIGATION SYSTEM FOR AUTONOMOUS AERIAL REFUELING

AIAA-2002-3441

John Valasek, Jennifer Kimmett, Declan Hughes, Kiran Gunnam, and John L. Junkins

Aerospace Engineering

First AIAA UAV Systems, Technologies, and Operations Conference
Portsmouth, VA, 22 May 2002
The material contained in this presentation has aspects covered by an existing patent owned by the authors, in addition to features which are contained in a patent disclosure for air refueling just filed by the authors.

For information about the VisNav sensor and navigation system for other applications, please contact me at:
