What are the most positive aspects of this course?

The prof is very approachable and really wants you to learn the material. He has pushed me harder (no homo) and I have worked harder than in any previous course. Also, the Flight Simulator was cool.

What are the most positive aspects of this course?

Grading has been fair and consistent. Circle Yes or No. If No, tell why.

Mostly on the hw. Grading for mistakes was inconsistent from person to person from what I saw.

What qualities did you like most about your instructor?

I would say that I thought he really wanted us to learn the material which is what I like, but I could only tell this because he seemed to put his class above all other classes and forget we had other classes when assigning homework.

What qualities did you like least about your instructor?

His expectations were too high for a student taking their first stability and control class. He expected on a test for students to know the derivations for all the derivatives and how everything works, specifically. I can understand using the class to gain a general to somewhat specific knowledge of the topic but it is too much to expect them to know everything in their first class on the topic.
